The possibilities to select the file format are unlimited and you can export your JPEG or PNG files in different formats. The file-type selector is also a great feature as it allows you to export the file to the right format, for example a JPG to a PNG. The best part is that it works out of the box. Save your images and you are ready to go. The plugin does not interfere with your workflow in any way. And once you feel comfortable with the plugin you can add a long list of file formats to it. You can now export any supported image format to JPG, PNG and many more, as long as you add them to the plugin. And since the plugin is a new one it is fully updated for Photoshop CC 2018, including a very polished user interface and native support for Smart Objects. **The source for the data is included in the user guide, so you can also update your images with the knowledge you gained while reading. ** The information is also available in a [magazine-style article](and the [online manual](Check out the support page for more information and if you have any questions, let us know. We are here to help. You can also find us on the Adobe communities . . .]!r ## The plugin is a new feature, it does not replace anything, it just adds a button to your toolbox. The Photoshop for makers plugin does not replace the Image Processor or any of your other plugins. The plugin was made to have a place in your workflow, to easily get you working on the images you take. We hope you like it, and if you do, why not go and give it a try? You can always download the update by logging in to your Filmmaster account. You can then click the “update plugins” button under “Content” on the menu at the top left of your screen. 82157476af
